Hypetype-studio

<https://httpster.net/website/hypetype-studio/>

I like this design because it is like there is full of things in the page and there is a feeling about there is no empty places and like there is full of information in there.

It uses multiple images and its purpose I think it's why this design got my attention, because it gives the impression that the site is full of information.

Limlondon

The choice of the colors and the styles are perfect, I love them and the spacing too, it's a good design with a great choice of everything.

I think it uses a background image and its purpose I think may be get your attention with the colors and the style of the elements.
